PROFESSIONAL SUMMARY

Product-minded engineer transitioning into Product Management, offering 6+ years of technical systems execution in telecom network infrastructure combined with formal Executive Product Management education from IIM Tiruchirappalli. Demonstrated end-to-end product thinking across 3 flagship implementations (ReviewFlow, Unrot, Experiment Tracker) and 7 supporting product teardowns—authoring PRDs, Gherkin acceptance criteria, RICE/MoSCoW prioritization frameworks, automated verification suites, and interactive prototypes. Proven ability to translate ambiguous operational problems into structured technical execution, coordinate cross-functional engineering teams, and design AI workflows with rigorous evaluation and anti-hallucination guardrails.

CORE PRODUCT & TECHNICAL COMPETENCIES

- **Product Strategy & Discovery:** Problem discovery, user journey mapping, Jobs-to-be-Done (JTBD), PRD authoring, user stories & Gherkin acceptance criteria, competitive benchmarking.
- **Prioritization & Scoping:** RICE & MoSCoW prioritization, Impact vs. Effort matrices, MVP boundary scoping, trade-off documentation, decision records.
- **Experimentation & Metrics:** A/B test design, sample size & statistical power calculations, cohort retention modeling (D1/D7), evaluation metrics (precision, hallucination rate).
- **AI Product Integrity:** Deterministic AI output grading, prompt architecture, synthetic evaluation fixtures, hallucination mitigation guardrails, executive AI workflows.
- **Technical Execution & Tools:** Python, Flask, SQLite, TypeScript, SQL queries & data modeling, REST APIs, Git, Jira, Trello, Confluence documentation, FMEA root-cause analysis.

FEATURED PRODUCT CASE STUDIES (INDEPENDENT IMPLEMENTATIONS)

ReviewFlow — AI-Assisted Customer Review Drafting & Quality Evaluation ***[PRD, Evaluation Pipeline & Live Prototype]***

- Scoped product boundaries for an AI review drafting tool helping salon customers articulate authentic Google reviews while preventing hallucinated claims.
- Authored 8 structured product decision records; deliberately deprioritized automatic posting to Google to eliminate hallucination liability.
- Scoped MVP with MoSCoW; developed an offline 15-case regression suite and deterministic evaluator measuring rating consistency and format compliance.

Unrot — Daily Retention Modeling & Cross-Functional Prioritization ***[Retention Modeling, Experiment Design & Simulated Decision Brief]***

- Investigated educational habit decay; built a Day 1 retention measurement model and formulated testable Jobs-to-be-Done (JTBD) hypotheses.
- Engineered a complete A/B experiment plan with power calculations and sample size requirements to test return-intent notification timing.
- Authored a simulated 6-role cross-functional decision brief (Product, Business, UX, Data, Eng, QA) demonstrating trade-off alignment as a portfolio exercise.

Experiment Tracker — Statistical Rigor & Decision-Support System ***[PRD Scoping, 17-Category Verification & Functional Prototype]***

- Identified the 'experiment graveyard' friction point where test results lack structured conclusion capture and explicit launch/kill decision criteria.
- Authored an 8-candidate product brief; prioritized conclusion capture (closing the loop in ~27 lines) over non-essential charting and complex auth.
- Structured a 17-category verification suite and authored 26 automated test functions covering database integrity and decision gating.

Windows Taskflow & IRCTC Rail Connect — Product Teardowns & Prototypes ***[User Journey Mapping, Concurrency Analysis & Clickable Prototypes]***

- **Windows Taskflow:** Authored PRD for context-aware workspaces; scoped backlog via RICE, defining <3.5s state restoration as P0 KPI with interactive mockup.
- **IRCTC Rail Connect:** Analyzed high-concurrency booking failure modes (latency, layout shifts, timeouts) across an illustrative funnel; built an interactive prototype with passenger autofill and queue handling.

PROFESSIONAL EXPERIENCE (ENGINEERING EXECUTION & TRANSFERABLE PM SKILLS)

Nokia Solutions and Networks India Pvt Ltd — Engineer (Systems & Hardware Diagnostics) ***(Sep 2023 – Present)***

- Execute hands-on diagnostic testing, troubleshooting, and root-cause analysis (RCA) on carrier telecom systems: Nokia SM1660 Matrix E, GPON Fixed Network cards, and Nokia Wi-Fi.
- Coordinate cross-functional customer escalation triage across customer-facing teams, Site Reliability Engineers (SRE), and repair centre technical personnel.
- Translate vague field outage tickets into structured, reproducible diagnostic investigation plans, replicating field configurations to isolate intermittent hardware resets and prevent repeat failures.

Radio Design India Pvt Ltd — Repair Engineer ***(Dec 2020 – 2021)***

- Conducted diagnostic fault-finding, frequency tuning, and functional testing on RF routers and power amplifier units across stringent frequency specifications.
- Standardized alignment and verification procedures to ensure zero-defect deployment across live telecom infrastructure.

CTDI India Pvt Ltd (Communications Test Design India) — Repair Engineer ***(Feb 2018 – Dec 2020)***

- Executed component-level troubleshooting, repair, and qualification across Wi-Fi routers, modems, set-top boxes, and power supplies.
- Identified common failure modes across test stations, documenting repeatable diagnostic workflows to maintain turnaround standards.

iQor Global Services India Pvt Ltd — Repair Engineer ***(Oct 2017 – Feb 2018)***

- Performed functional testing, troubleshooting, and calibration for consumer digital set-top boxes (DEN Skyworth & Airtel STB), enforcing strict quality thresholds on borderline units.

EDUCATION & VERIFIED CREDENTIALS

- **Executive Education: Product Management in the Agentic AI Era** — IIM Tiruchirappalli (Coursework Completed 2026)
- **Product Owner Certification** — Udemy (Credential ID: F607C4712D38)
- **Python for AI** — ScholarHat (Credential ID: IJDU240126)
- **Management Consulting & Excel Analytics** — Jobaaj Learnings (Credential ID: AIJDW103334)
- **Bachelor of Technology (B.Tech) in Mechanical Engineering** — Kurukshetra University (2014 – 2017)
- **Diploma in Electronics & Communication Engineering (ECE)** — Govt. Polytechnic Ambala City (2010 – 2013)

TECHNICAL STACK & OPERATIONAL TOOLING

- **Telecom & Diagnostic Systems:** Carrier-grade DWDM/SDH (Nokia SM1660 Matrix E), GPON Optical Line Terminals (OLT) & ONTs, Nokia Wi-Fi beacons, RF signal generators & power amplifiers, spectrum analyzers.
- **Development & Product Analytics:** Python 3, Flask, SQLite, TypeScript, REST APIs, Git, Jira, Trello, Confluence, Microsoft Excel (Advanced financial & cohort modeling).
- **Methodologies & Quality Standards:** Root Cause Analysis (RCA), Failure Mode and Effects Analysis (FMEA), Gherkin BDD specs, MoSCoW / RICE prioritization, statistical power analysis, automated anti-hallucination evaluation suites.
