

# ASIM KUMAR

## PRODUCT MANAGER

8+ Years Technical Execution → Product Strategy, Roadmapping & Delivery

4 End-to-End Product Case Studies (PRD + Live Prototype) • IIM Tiruchirappalli — Product Management Certified • Agile & Data-Driven Execution

Gurugram, Haryana, India | +91 98177 53425 | asimkumar613@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

### ❖ SUMMARY

Product-minded engineer transitioning into Product Management, backed by four independently built, end-to-end product case studies — PRDs, user stories, wireframes, prioritization frameworks, and live interactive prototypes — demonstrating the full product lifecycle from problem discovery through delivery. Completed IIM Tiruchirappalli Product Management certification. 8+ years of prior technical execution across telecom hardware and network engineering contribute strong analytical rigor, root-cause thinking, and cross-functional collaboration habits that transfer directly into product work. Comfortable with Agile ceremonies, SQL/analytics-based decision-making, and Agile project-tracking tools (Jira, Trello, Asana). Open to Product Manager and Associate Product Manager opportunities.

### ❖ PROOF OF WORK

Live portfolio — four end-to-end product case studies, each with a PRD, user stories, wireframes, a prioritization framework, and a working interactive prototype: [asim-k-portfolio.netlify.app](#)

- ▶ **Windows 11 — Taskflow (Context-Aware Workspaces):** Wrote the PRD, user stories, and acceptance criteria for a native Windows Shell feature saving multi-app work contexts as shareable workspaces. Prioritized backlog via RICE/MoSCoW; defined <3.5s state-restore latency as the P0 KPI; designed shareable links as a viral growth loop and OneDrive-retention lever. [Case study →](#)
- ▶ **IRCTC Rail Connect — Checkout & Concurrency Redesign:** Ran competitive/market research and funnel diagnostics to isolate 3 checkout failure modes inside India's highest-stakes 75-minute Tatkal booking window; used MoSCoW backlog triage to scope 2 P0 user stories (autofill, ad-script freeze) targeting checkout completion, validated with a working before/after prototype. [Case study →](#)
- ▶ **Google Workspace — Ambient Context Engine:** Defined the MVP scope and user stories for an AI sidebar in Google Docs that surfaces relevant files, internal experts, and risk flags via org-graph matching without interrupting writing flow. Sequenced roadmap with Impact vs. Effort; wireframed and prototyped end-to-end in a working Docs-style editor. [Case study →](#)
- ▶ **LoDo — Credit, Orchestrated:** Scoped a fintech marketplace MVP running a transparent, timed lender auction on one verified borrower profile. Built a MoSCoW-gated trust framework (consent, verification, normalized cost comparison) and a live interactive decision-dashboard prototype with defined success KPIs. [Case study →](#)

### ❖ CORE PRODUCT SKILLS

Product Strategy & Roadmapping · User Stories & Acceptance Criteria · PRD Writing · Prioritization Frameworks (RICE, MoSCoW, Impact vs. Effort) · Market & Competitive Research · Agile & Scrum · Sprint Planning & Backlog Grooming · Cross-Functional Stakeholder Management · KPI Definition & Tracking · User Research & Product Discovery · A/B Testing Methodology (Trained) · Wireframing & Prototyping · AI-Assisted Product Development

### ❖ TECHNICAL SKILLS & TOOLS

Jira · Trello · Asana · SQL · Excel (Data Analysis & Dashboards) · Google Analytics · Figma (Wireframes & Prototypes) · Python (Applied AI) · Confluence-style Documentation

### ❖ PROFESSIONAL EXPERIENCE

Prior technical roles — included to show analytical rigor, ownership, and cross-functional execution habits that transfer directly into product work.

#### Senior Engineer

Sep 2023 – Present

Nokia Solutions · Gurugram, India

- ▶ Gather requirements from customer escalations on GPON Fixed Network Cards, OLT platforms, and IP Routers and translate them into structured investigation plans — the same requirements-gathering and root-cause discipline used to scope user stories in product work.

- ▶ Use Agile project-tracking tools (Jira/Trello-style boards) to manage escalation investigations, prioritize fixes, and coordinate handoffs across engineering teams.
- ▶ Introduced structured diagnostic frameworks into team workflows, improving troubleshooting consistency and reducing recurring downtime — a process-design and continuous-improvement exercise.
- ▶ Applying IIM product management training and independent case-study work (4 shipped product prototypes, above) to build formal product strategy, prioritization, and stakeholder-communication skills.

### Research & Development Engineer

Jan 2020 – Jul 2023

*Radio Design India Pvt Ltd · Manesar, India*

- ▶ Owned the full product lifecycle — design, RF tuning, testing, and system integration — for Power Amplifiers deployed into live international telecom networks with no local support post-deployment.
- ▶ Redesigned RF tuning and validation processes, reducing testing and integration time while improving field reliability — a data-driven, metrics-based process improvement.

### Repair Engineer

Feb 2018 – Oct 2019

*Communication Test Design India Pvt Ltd (CTDI) · Manesar, India*

- ▶ Standardized diagnostic and troubleshooting workflows for routers, STBs, and telecom boards across a 240+ devices/day repair floor, cutting average repair time by ~40 minutes per unit.
- ▶ Improved SLA compliance and reduced repeat failures by shifting the team from individual troubleshooting to one shared, documented, repeatable process.

### Test Engineer

Aug 2017 – Feb 2018

*iQor Global Services India Pvt Ltd · Gurugram, India*

- ▶ Owned testing, troubleshooting, and calibration for DEN Skyworth and Airtel set-top boxes, building an early discipline of flagging borderline units rather than passing them under schedule pressure.

## ❖ PRODUCT MANAGEMENT TRAINING & CERTIFICATIONS

---

- ▶ **Product Management in the Agentic AI Era** — Indian Institute of Management, Tiruchirappalli — Completed, Aug 2026 (Jan 2026 – Aug 2026). Coursework: product strategy, discovery, roadmapping, prioritization, stakeholder alignment.
- ▶ Product Owner Certification — Udemy (backlog management, sprint planning, Agile ceremonies)
- ▶ Management Consulting Overview — Jobaaj Learnings
- ▶ Python for AI — ScholarHat
- ▶ Microsoft Excel — Jobaaj Learnings

## ❖ EDUCATION

---

### B.Tech, Mechanical Engineering

Jul 2014 – May 2018

*Kurukshetra University*

### Diploma, Electronics & Communications Engineering

Aug 2010 – May 2013

*Govt. Polytechnic College*
